THE essential barbarity and final inadequacy of man in the grip of malevolent fate is a recurring theme in Shakespearean tragedy. The career of Macbeth illustrates not so much the direct influence of the Supernatural as the power of self-delusion in the destruction of a potentially great and noble man.

We are reminded of the thinness of the veneer of "civilized" behaviour in human society as we see the whole moral fabric of a kingdom corrupted in darkness, violence and mistrust.

The lesson has a contemporary flavour.
